

What is colorpop™

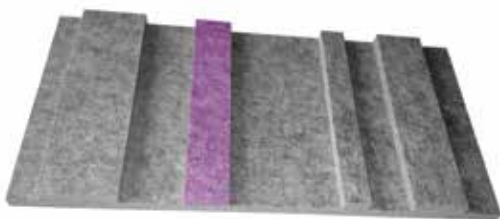

..... its the merging of design and fabrication to insert a color or colors to an otherwise monochromatic product. Think corporate brand ID meets individual color indentifiers for each parking garage level.

Why colorpop™

.....add a splash of color to visually ID company departments and functions, subtly and visually separate floor levels or as a pure thematic design element. Pop that color, whether loud or muted, warm or cool, tone on tone... and bring a little more life to the project ...you won't regret it!

HOW to colorpop™

..... this one is all on you! Take a static Cloud or Baffle and kick up the volume! Solid wall of monochrome tiles BE GONE! Throw in some fun!

Methods to apply colorpop™ into your design:

Paired with ADL's DUO series of custom layered tiles and baffles, select an element or area to apply the colorpop™ and let the design scream out loud! This design concept can be applied to nearly all the products made by Acoustic Design Lab. From the entire ZenTile and ZenBaffle range to ZenClouds and ZenStars - there is no stopping the pop!

Entire ZenWall panels are made to accommodate ADL's trademark colorpop™. Exceed your prior limits from lesser fabricators and embed or layer custom shapes using our entire color range
