

WHAT IS HPxNRC™

.....exactly as it reads...High Performance Noise Reduction Coefficient. These are designs that perform above an NRC of 0.70 (average sound absorption of 70%)

Acoustic Design Lab applies this icon to our products that have been lab tested at or above NRC 0.70 or calculated above NRC 0.80

WHY HPxNRC™

..... performance, value and client satisfaction. You can effectively and aesthetically improve a space with less material and a lower budget, go for it!

HOW TO HPxNRC™

..... most high performance acoustic products tend to have greater depth, thickness, mass and geometry engineered into the design. Whether a cored Baffle, 3D Cloud or Tile or a custom designed ZenWall installation, we promise to overperform vs. the competition!

HPxNRC™ Custom AvailableList Below is a Selection of Existing Products

- ZenTile 3D Series
- ZenTile HP Series
- ZenWall HP Series
- ZenWall DUO
- ZenBaffle DUO
- ZenBaffle PLUS 2
- ZenBaffle H Dub
- ZenStar DUO
- ZenCloud HP Series
- ZenScreen DUO
- ZenGrid DUO (ACT)
- ZenGrid 3D (ACT)
